

# General Taper Conversion System

## FEATURES:

- ◆ Easy to install
- ◆ Low Profile (1/2" height) to handle tight folds
- ◆ Hot melt system can be added within the same shoe for cold/hot glue applications
- ◆ 1/2 roller exchanges only. No full roller has to be removed for adhesive equipment
- ◆ Multiple voltage choices to match your tapping solenoid voltage
- ◆ Tough, hardened applicator design provides automatic alignment and long life
- ◆ Available in a variety of adhesive supply options
- ◆ Prices you can live with on valves, applicator heads, and valve repair kits

The [HAECO General Taper Conversion System](http://www.haeco.us), when purchased with the appropriate applicator head, provides all the equipment necessary to make your system capable for dispensing cold glue within your General Taper. You will find that the rigidity, adjustability, and low system can be inserted directly into the original shoe upstream of the cold glue applicator. With the purchase of a center gap glue applicator, you can have hot melt tack and cold glue strength on every box. **It's production at its best.**
